Professional Summary

Full Stack Developer with experience building and maintaining enterprise software in production environments. Currently working at Nimble Gravity, contributing to an ERP ecosystem for the vending industry by developing backend and frontend features, integrating payment providers, and modernizing legacy applications. Experienced with PHP, Angular, Next.js, Ionic and TypeScript, with a strong focus on clean architecture, maintainability and scalable software.

Professional Experience

Full Stack Developer

Apr 2025 – Present

Nimble Gravity

- Develop and maintain an ERP ecosystem composed of web, mobile and integrated applications for vending machine management.
- Build frontend and backend features using PHP (Laravel, CakePHP), Angular, Next.js, Ionic and TypeScript.
- Integrate payment providers including Clover, Fiserv ITD, Izipay and Mercado Pago.
- Design and implement REST APIs used by web applications, mobile apps and self-service terminals.
- Participate in the migration from AngularJS to modern Angular versions.
- Improve maintainability and application performance through continuous refactoring.
- Collaborate in Agile teams using Git, Jira and code reviews.

Technologies
